7075 Aluminum Alloy 7075 aluminum alloy is a representative product of the 7000 series (Al-Zn-Mg-Cu) aluminum alloy. It is a heat-treatable alloy, it is the strongest aluminum alloy among common aluminum alloys.	Dofollow
6000 series aluminum alloy 6000 series aluminum alloy is an alloy composed of aluminum, magnesium, silicon, zinc and other elements. Among them, aluminum is the main component, accounting for more than 90%. It has the characteristics of light weight, good thermal conductivity and electrical conductivity.	Dofollow
6082 Aluminum Alloy Sheet 6082 aluminum alloy is a heat-treatable 6000 series aluminum alloy with better performance than 6061 and is also the strongest 6000 series aluminum alloy.	Dofollow
6063 aluminum alloy sheet 6063 aluminum alloy sheet is the most popular product among the 6000 series aluminum alloys. Its aluminum content is more than 98.9% and it is a medium-strength aluminum alloy.	Dofollow
6061 aluminum sheet 6061 aluminum sheet is a heat-treatable alloy sheet and is a representative product of the 6000 series aluminum alloy (Al-Mg-Si). It has high strength and corrosion resistance and is widely used.	Dofollow
5000 series aluminum alloy 5000 series aluminum alloy al-mg alloy, the magnesium content is between 3-5%, the representative products are 5052, 5005, 5083, 5086, 5454, 5754 aluminum alloy, etc.	Dofollow
5754 aluminium sheet plate 5754 aluminium sheet is a high-strength non-heat-treatable alloy with good corrosion resistance, weldability and easy processing. It is widely used in high-speed rail sound insulation barriers, fuel tanks, tank car body materials, aluminum in the construction field, aluminum in transportation, Automotive aluminum and other fields.	Dofollow
5454 aluminum sheet 5454 aluminum sheet is a popular aluminum alloy that is widely used in ship structures such as speedboats, yachts, fishing boats, large freighters, internal pressure vessels, and pipes due to its excellent combination of strength, corrosion resistance, and formability.	Dofollow
1235 aluminum foil 1235 aluminum foil refers to aluminum foil with an aluminum content of no less than 99.35%. It belongs to the 1000 series pure aluminum series and is widely used in the fields of electronic components and flexible packaging.	Dofollow

8021 Aluminum Foil 8021 aluminum foil has excellent moisture-proof performance, light-shielding and high barrier ability, non-toxic and tasteless, safe and hygienic. Battery soft packaging aluminum foil, cold forming pharmaceutical packaging aluminum foil, food packaging are the main applications of 8021 aluminum foil.	Dofollow
8011 Aluminum Foil 8011 aluminum foil belongs to the 8xxx series alloy, which is added with Fe and Si, performance of 8011 aluminum foil is better than that of 1000 series pure aluminum foil.	Dofollow
