172.67.167.247	United States Hide IP Address Show Full IP Address Information Look (FAQ) What is IPV4? IPV4 stands for Internet Protocol version 4. It simply means a standard internet address. This address is usually shown as four numbers that are separated by dots (Example - 2001.192.168.1) but there is a new system called IPV6 that is gradually being used to replace IPV4. IPV6 is the latest internet addressing system that is designed to replace IPV4. It is a 128-bit address system that is separated by colons (Example - 2001:0db8:0000:0000:0000:0000:0000:0000)
