What Is a VPN Kill Switch and How Does It Keep Your Data Safe?

A VPN Kill Switch is a feature that automatically disconnects your device from the internet if the VPN connection drops. This ensures that your data remains secure and is not sent over an unencrypted network.

172.67.195.164	United States Hide IP AddressShow Full IP Address Information Lookup AddressLookup Frequently Asked Questions (FAQ)What is IPV4?IPv4 connect to the internet by using a unique address. This address is usually 203.0.113.181). It has been around for a while but there is a new system IPV6?IPv6 stands for Internet Protocol version 6. It is the latest internet addresses, eight groups of four hexadecimal numbers separated by color
