Aksa Power Generation

aksa.uz/

Aksa Power Generation 1 kVA and 3125 kVA gasoline diesel and natural gas fuel generators are marine auxiliary generators, lighting towers and generator drivers.

✔ **Doctype** Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in.

Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in. The most common doctype is HTML5. It is important to have a doctype because it affects the rendering of the page. Without a doctype, the browser will use a default doctype, which may not be the one you want. The doctype also affects the validation of the document. A valid doctype is required for a document to be considered valid.

● **W3C Validity** W3C Validity is a tool that checks if your HTML document is valid according to the W3C standards.

W3C - World Wide Web Consortium. It is an international community that develops and maintains standards for the World Wide Web. The W3C standards are the rules that govern how web pages are created and how they are displayed. The W3C standards are designed to ensure that web pages are accessible to all users, regardless of the device or browser they are using. The W3C standards are also designed to ensure that web pages are easy to use and that they are visually appealing. The W3C standards are the foundation of the World Wide Web.

✔ **Charset** Charset is the character set used in the document. It tells the browser which characters are allowed in the document.

Charset is the character set used in the document. It tells the browser which characters are allowed in the document. The most common charset is UTF-8. It is important to have a charset because it affects the rendering of the page. Without a charset, the browser will use a default charset, which may not be the one you want. The charset also affects the validation of the document. A valid charset is required for a document to be considered valid.
