 Doctype Doctype is the first line of code in an HTML document. It tells the browser which version of HTML the document is written in.

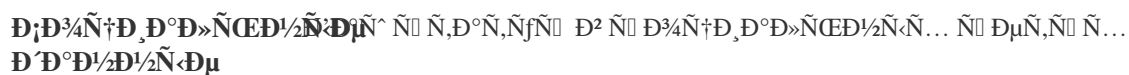

Doctype is the first line of code in an HTML document. It tells the browser which version of HTML the document is written in. The most common doctype is HTML5. It is important to have the correct doctype to ensure that your website displays correctly across different browsers.

 W3C Validity W3C Validity is a service that checks if your HTML code is valid according to the W3C standards.

W3C - World Wide Web Consortium. It is an international community that develops standards for the World Wide Web. The W3C standards ensure that web pages are accessible and consistent across different browsers and devices.

 Meta Tags Meta tags are HTML attributes that provide information about the document, such as the title, description, and keywords.

Meta tags are HTML attributes that provide information about the document, such as the title, description, and keywords. They are used to help search engines understand the content of your website and to provide a better user experience.
