✔ **Doctype** Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in.

Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in. The most common doctype is HTML5. It is important to have the correct doctype to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate doctype for that version. For example, if you are using HTML4, you should use the HTML4 doctype. If you are using XHTML, you should use the XHTML doctype. The doctype is not case-sensitive, so you can use uppercase or lowercase letters. However, it is recommended to use lowercase letters for consistency. The doctype is also not a required element, but it is highly recommended to include it in all HTML documents.

● **W3C Validity** W3C Validity is a tool that checks if your HTML document is valid according to the W3C standards.

W3C - World Wide Web Consortium. It is an international community of developers of Internet-based technologies that aims to develop standards and guidelines for the World Wide Web. The W3C is responsible for the development of the HTML, CSS, and XML standards. The W3C also provides a variety of tools and resources for web developers. One of the most popular tools is the W3C Validator, which checks if your HTML document is valid according to the W3C standards. The W3C Validator is a free online tool that you can use to check the validity of your HTML document. It will tell you if there are any errors in your code and provide suggestions for how to fix them. The W3C Validator is a great tool for ensuring that your HTML document is valid and that it will render correctly in all browsers.

✔ **Charset** Charset is the character set used in the document. It tells the browser which encoding the document is written in.

Charset is the character set used in the document. It tells the browser which encoding the document is written in. The most common charset is UTF-8. It is important to have the correct charset to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate charset for that version. For example, if you are using HTML4, you should use the HTML4 charset. If you are using XHTML, you should use the XHTML charset. The charset is not case-sensitive, so you can use uppercase or lowercase letters. However, it is recommended to use lowercase letters for consistency. The charset is also not a required element, but it is highly recommended to include it in all HTML documents.
