✔ **Doctype** Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in.

Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in. The most common doctype is HTML5. It is important to have the correct doctype to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate doctype for that version. For example, if you are using HTML4, you should use the HTML4 doctype. If you are using HTML5, you should use the HTML5 doctype. The HTML5 doctype is the simplest and most widely supported. It is also the most future-proof. It is recommended to use the HTML5 doctype for all new websites.

● **W3C Validity** W3C is the World Wide Web Consortium. It is the main international standards organization for the World Wide Web. It develops and maintains the standards for HTML, CSS, and JavaScript. It also provides tools and resources for web developers to ensure that their websites are valid and conform to the standards.

W3C - World Wide Web Consortium. It is the main international standards organization for the World Wide Web. It develops and maintains the standards for HTML, CSS, and JavaScript. It also provides tools and resources for web developers to ensure that their websites are valid and conform to the standards. The W3C website is a valuable resource for web developers. It provides a wealth of information about the latest standards and best practices for web development. It also offers a variety of tools and resources to help developers create valid and standards-compliant websites. One of the most important tools provided by the W3C is the W3C Validator. This tool checks the HTML and CSS code of a website to ensure that it is valid and conform to the standards. It is a free service that can be used by anyone. It is highly recommended to use the W3C Validator to check the validity of your website's code. This will help you identify any errors or issues that may be causing problems with the rendering of your website. It will also ensure that your website is compatible with all major browsers and devices. By using the W3C Validator, you can ensure that your website is of the highest quality and provides the best user experience possible.

✔ **Charset** Charset is the character set used in the document. It defines the mapping between the bytes in the document and the characters that they represent. The most common charset is UTF-8. It is important to specify the charset in the document to ensure that the characters are rendered correctly. If you do not specify the charset, the browser will assume a default charset, which may not be the correct one for your document. This can lead to garbled text or other rendering issues. To avoid this, you should always specify the charset in the document. The most common way to do this is to use the charset attribute in the meta tag. For example, you can use the following code to specify UTF-8 as the charset: <meta charset="UTF-8">. This will ensure that the characters in your document are rendered correctly, regardless of the browser or device used to view the document.

Charset is the character set used in the document. It defines the mapping between the bytes in the document and the characters that they represent. The most common charset is UTF-8. It is important to specify the charset in the document to ensure that the characters are rendered correctly. If you do not specify the charset, the browser will assume a default charset, which may not be the correct one for your document. This can lead to garbled text or other rendering issues. To avoid this, you should always specify the charset in the document. The most common way to do this is to use the charset attribute in the meta tag. For example, you can use the following code to specify UTF-8 as the charset: <meta charset="UTF-8">. This will ensure that the characters in your document are rendered correctly, regardless of the browser or device used to view the document.
