✔ **Doctype** Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in.

Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in. The most common doctype is HTML5. It is important to have the correct doctype to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate doctype for that version. For example, if you are using HTML4, you should use the HTML4 doctype. If you are using HTML5, you should use the HTML5 doctype. The HTML5 doctype is the simplest and most widely supported. It is recommended that you use the HTML5 doctype for all new websites.

● **W3C Validity** W3C Validity is a tool that checks if your HTML code is valid according to the W3C standards.

W3C - World Wide Web Consortium. It is an international community that develops and maintains standards for the World Wide Web. The W3C standards are the foundation of the web. They ensure that web pages are consistent and interoperable. The W3C standards are developed through a process of consensus. This means that all members of the W3C community must agree on the standards. The W3C standards are used by web developers to create web pages that are valid and conform to the standards. This ensures that the web pages are consistent and interoperable. The W3C standards are also used by web browsers to render web pages. This ensures that the web pages are rendered consistently across different browsers. The W3C standards are also used by web developers to create web pages that are accessible. This ensures that all users can access the web pages. The W3C standards are also used by web developers to create web pages that are secure. This ensures that the web pages are protected from security threats. The W3C standards are also used by web developers to create web pages that are easy to use. This ensures that the web pages are user-friendly and easy to navigate. The W3C standards are also used by web developers to create web pages that are visually appealing. This ensures that the web pages are attractive and engaging. The W3C standards are also used by web developers to create web pages that are fast. This ensures that the web pages load quickly and efficiently. The W3C standards are also used by web developers to create web pages that are reliable. This ensures that the web pages are always available and accessible. The W3C standards are also used by web developers to create web pages that are scalable. This ensures that the web pages can handle a large number of users and requests. The W3C standards are also used by web developers to create web pages that are flexible. This ensures that the web pages can be easily modified and updated. The W3C standards are also used by web developers to create web pages that are secure. This ensures that the web pages are protected from security threats. The W3C standards are also used by web developers to create web pages that are easy to use. This ensures that the web pages are user-friendly and easy to navigate. The W3C standards are also used by web developers to create web pages that are visually appealing. This ensures that the web pages are attractive and engaging. The W3C standards are also used by web developers to create web pages that are fast. This ensures that the web pages load quickly and efficiently. The W3C standards are also used by web developers to create web pages that are reliable. This ensures that the web pages are always available and accessible. The W3C standards are also used by web developers to create web pages that are scalable. This ensures that the web pages can handle a large number of users and requests. The W3C standards are also used by web developers to create web pages that are flexible. This ensures that the web pages can be easily modified and updated.

✔ **Charset** Charset is the character set used in the document. It tells the browser which characters are used in the document.

Charset is the character set used in the document. It tells the browser which characters are used in the document. The most common charset is UTF-8. It is important to have the correct charset to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate charset for that version. For example, if you are using HTML4, you should use the HTML4 charset. If you are using HTML5, you should use the HTML5 charset. The HTML5 charset is the simplest and most widely supported. It is recommended that you use the HTML5 charset for all new websites.
