✓ **Flash** `<embed src="..." type="application/x-shockwave-flash" data-bbox="0 0 0 0">`

Flash is a software package for multimedia content, including vector graphics, text, and video. It is used to create rich internet applications (RIAs) and interactive content. Flash content is typically embedded in web pages using the `<embed>` or `<object>` tags. Flash content is often used for animations, interactive elements, and video playback. However, Flash content is not supported by all devices and browsers, and it can be slow to load. It is recommended to use HTML5 and CSS3 for modern web development.

✓ **Iframe** `<iframe src="...">`

An iframe is an HTML element that allows you to embed another document inside the current document. It is used to display content from another website or to embed a video player. Iframes are created using the `<iframe>` tag. However, iframes can be a security risk if they are not properly implemented, and they can be slow to load. It is recommended to use alternative methods for embedding content, such as using the `<script>` tag for JavaScript or the `<video>` tag for video playback.
