IFRAME

IFRAME is a web browser element that allows you to embed another document inside the current document. It is used to embed content from other websites, such as videos, images, and social media feeds.

The basic syntax for an IFRAME is as follows:

```

<iframe src="url" width="width" height="height">
  Content of the embedded document
</iframe>
  
```

The `src` attribute is required and specifies the URL of the document to be embedded. The `width` and `height` attributes are optional and specify the dimensions of the embedded document.

IFRAMEs can be used to embed content from other websites, but they can also be used to load malicious content. Therefore, it is important to use IFRAMEs carefully and to ensure that the content being embedded is from a trusted source.

1. **SEO** - Search Engine Optimization. It's a process of making your website more visible to search engines like Google, Bing, and Yahoo.

2. **Content** - The information you provide on your website. It can be text, images, videos, or audio. Good content is relevant, informative, and engaging.

3. **Keywords** - Words and phrases that people use to search for information. They are the bridge between what you want to say and what your audience is looking for.

4. **Backlinks** - Links from other websites that point to your website. They are like votes of confidence and can help improve your search engine ranking.

5. **Analytics** - Tools that help you track and measure the performance of your website. They tell you how many people are visiting, where they're coming from, and what they're doing on your site.
