✔ **Doctype** Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in.

Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in. The most common doctype is HTML5. It is important to have the correct doctype to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate doctype for that version. For example, if you are using HTML4, you should use the HTML4 doctype. If you are using HTML5, you should use the HTML5 doctype. The HTML5 doctype is the most common and is recommended for all new websites.

● **W3C Validity** W3C Validity is a tool that checks if your HTML code is valid according to the W3C standards.

W3C - World Wide Web Consortium. It is an international community that develops and maintains standards for the World Wide Web. The W3C standards are the foundation of the web. They ensure that web pages are consistent and can be accessed by all users. The W3C standards are developed through a process of consensus. Members of the W3C community propose changes to the standards, and these changes are then discussed and voted on by the community. Once a change is approved, it becomes part of the standard. The W3C standards are used by web developers to create web pages that are consistent and can be accessed by all users. This ensures that web pages are reliable and can be used by a wide range of devices and browsers.

✔ **Charset** Charset is the character set used in the document. It tells the browser which encoding the document is written in.

Charset is the character set used in the document. It tells the browser which encoding the document is written in. The most common charset is UTF-8. It is important to have the correct charset to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate charset for that version. For example, if you are using HTML4, you should use the HTML4 charset. If you are using HTML5, you should use the HTML5 charset. The HTML5 charset is the most common and is recommended for all new websites.
