✔ **Doctype** Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in.

Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in. The most common doctype is HTML5. It is important to have the correct doctype to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate doctype for that version. For example, if you are using HTML4, you should use the HTML4 doctype. If you are using HTML5, you should use the HTML5 doctype. The HTML5 doctype is the most common and is recommended for all new websites.

● **W3C Validity** W3C is the World Wide Web Consortium. It is the international community that develops and maintains the standards for the World Wide Web.

W3C is the World Wide Web Consortium. It is the international community that develops and maintains the standards for the World Wide Web. The W3C standards are the foundation of the World Wide Web. They define how web pages are structured and how they are displayed. The W3C standards are also used to create web browsers and other web-related software. The W3C standards are constantly evolving, and it is important to keep up to date with the latest standards. This ensures that your website is compatible with the latest web browsers and other web-related software. The W3C standards are also used to create web browsers and other web-related software. The W3C standards are constantly evolving, and it is important to keep up to date with the latest standards. This ensures that your website is compatible with the latest web browsers and other web-related software.

✔ **Charset** Charset is the character set used in the document. It defines the mapping between the characters in the document and the bytes in the document.

Charset is the character set used in the document. It defines the mapping between the characters in the document and the bytes in the document. The most common charset is UTF-8. It is important to have the correct charset to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate charset for that version. For example, if you are using HTML4, you should use the HTML4 charset. If you are using HTML5, you should use the HTML5 charset. The HTML5 charset is the most common and is recommended for all new websites.
