✓ **Flash** `<embed src="..." type="application/x-shockwave-flash" data-bbox="0 0 0 0" />`

Flash is a software platform for creating interactive content. It is used to create rich internet applications (RIAs) and animations. Flash content is typically delivered as a single file (SWF) that is embedded in a web page. Flash is supported by most major web browsers, but it is not supported by all mobile devices and operating systems. Flash is also used for video streaming and online gaming.

✓ **Iframe** `<iframe src="..." />`

An iframe is an HTML element that allows you to embed another document inside the current document. It is used to embed content from other websites, such as images, videos, and social media widgets. Iframes are useful for creating a more integrated and interactive user experience. However, iframes can also be used for phishing and other malicious purposes, so it is important to use them carefully and only from trusted sources.
