Charset is the character set used in the document. It defines the mapping between the bytes in the document and the characters that they represent. The most common charset is UTF-8. It is important to specify the charset in the document to ensure that the characters are displayed correctly. If you do not specify the charset, the browser will assume a default charset, which may not be the correct one. This can lead to characters being displayed incorrectly. By specifying the charset, you can ensure that the characters are displayed as intended. UTF-8 is a good choice for most websites as it can represent all the characters in the world's languages. It is also efficient in terms of file size.
