 **Charset** Charset is a declaration of the character encoding used in the document. It is a line of text placed at the top of the page, before the `<html>` tag.

Charset is a declaration of the character encoding used in the document. It is a line of text placed at the top of the page, before the `<html>` tag. The most common charset is `UTF-8`, which is used for all modern web pages. Other charsets include `UTF-16`, `UTF-32`, and `ISO-8859-1`. The charset is used to tell the browser which encoding to use. If the charset is not declared, the browser will use its default encoding, which may not be the best for your page.
