SEO Audit Report: This report provides a comprehensive analysis of the website's search engine optimization performance. It identifies key areas for improvement, such as missing H1 tags and a lack of H4, H5, and H6 tags. The audit also highlights the presence of various coupon-related content, including recent updates and general FAQs. The overall goal is to enhance the website's visibility and user experience through targeted SEO recommendations.

**URL** `https://example.com/path/with/underscores/` (these\_are\_underscores) `https://example.com/path/with/underscores/`

Underscores (these\_are\_underscores) in URLs are ignored by search engines. `https://example.com/path/with/underscores/` is treated the same as `https://example.com/path/withunderscores/`.

Googlebot will not crawl paths containing underscores. For example, `https://example.com/path/with/underscores/` will not be crawled, but `https://example.com/path/withunderscores/` will.

✓ **Flash** `<embed src="..." type="application/x-shockwave-flash" data-bbox="0 0 0 0" />`

Flash is a software platform for creating interactive content. It is used to create rich internet applications (RIAs) and interactive web pages. Flash content is typically embedded in web pages using the `<embed>` or `<object>` tags. Flash content can be used for a variety of purposes, including creating animations, interactive forms, and rich media presentations. However, Flash content is not supported by all web browsers, and its use is generally discouraged in favor of more accessible and performant technologies like HTML5 and CSS3.

✓ **Iframe** `<iframe src="..." />`

An iframe is an HTML element that allows you to embed another document inside the current document. It is used to display content from another website or to embed a video player, a map, or a social media widget. The `src` attribute of the `<iframe>` tag specifies the URL of the content to be displayed. It is important to use the `src` attribute correctly to avoid security issues and to ensure that the content is displayed as intended.

1. **SEO** - Search Engine Optimization. It's a process of making your website more visible to search engines like Google, Bing, and Yahoo.

2. **Content** - The information you provide on your website. It can be text, images, videos, or audio. Good content is relevant, informative, and engaging.

3. **Keywords** - Words and phrases that people use to search for information. They are the bridge between what you want to say and what your audience is looking for.

4. **Backlinks** - Links from other websites that point to your website. They are like votes of confidence and can help improve your search engine ranking.

5. **Analytics** - Tools that help you track and measure the performance of your website. They tell you how many people are visiting, where they're coming from, and what they're doing on your site.
