✓ **Flash** `<object classid="clsid:Flash" data-bbox="100 100 200 200" style="display:none"></object>`
 `<object classid="clsid:Flash" data-bbox="100 100 200 200" style="display:none"></object>`

Flash is a software package that runs on a computer and is used to create interactive content. It is often used for creating animations, interactive presentations, and rich internet applications. Flash content is typically embedded in web pages using the `<object>` and `<embed>` tags. However, due to security concerns and the fact that many browsers have stopped supporting Flash, it is recommended to use alternative technologies like HTML5 and CSS3 for creating interactive content.

✓ **Iframe** `<iframe src="http://www.example.com" data-bbox="100 100 200 200"></iframe>`

An iframe is an HTML element that allows you to embed another document inside the current document. It is often used to embed content from other websites, such as images, videos, and social media feeds. The `<iframe>` tag has several attributes that you can use to control the size and behavior of the embedded content. However, using iframes can be a security risk, so it is important to use them carefully and only embed content from trusted sources.

Textile Learner is a leading provider of online courses and resources for textile learners. The website offers a wide range of courses, including textile design, textile engineering, and textile marketing. The website is designed to be user-friendly and easy to navigate, with a clear and concise layout. The website is also optimized for search engines, making it easy for users to find the information they need. The website is a valuable resource for anyone interested in learning more about textiles.

Wearable Technology in Fashion Industry:

Wearable technology in the fashion industry is a growing trend. It involves integrating smart fabrics and sensors into clothing. This technology can track health metrics, provide navigation, and even control smart home devices. The fashion industry is embracing this technology to create more functional and interactive clothing. Smart fabrics can change color, texture, or even provide protection from the elements. The integration of technology into fashion is opening up new possibilities for designers and consumers alike.

1. **SEO** - Search Engine Optimization. It's a process of making your website more visible to search engines like Google, Bing, and Yahoo.

2. **Content** - The information you provide on your website. It can be text, images, videos, or audio. Good content is relevant, informative, and engaging.

3. **Keywords** - Words and phrases that people use to search for information. They are the bridge between what you want to say and what your audience is looking for.

4. **Backlinks** - Links from other websites that point to your website. They are like votes of confidence and can help improve your search engine ranking.

5. **Analytics** - Tools that help you track and measure the performance of your website. They tell you how many people are visiting, where they're coming from, and what they're doing on your site.
