✔ **Doctype** Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in.

Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in. The most common doctype is HTML5. It is important to have the correct doctype to ensure that the browser renders the page correctly. If you are using an older version of HTML, you should use the appropriate doctype for that version. For example, if you are using HTML4, you should use the HTML4 doctype. If you are using HTML5, you should use the HTML5 doctype. The HTML5 doctype is the most common and is recommended for all new websites.

● **W3C Validity** W3C Validity is a tool that checks if your HTML code is valid according to the W3C standards.

W3C - World Wide Web Consortium. It is an international community that develops and maintains standards for the World Wide Web. The W3C standards are the rules that govern how the web is built. They ensure that websites are consistent and can be used by everyone. The W3C standards are divided into three main areas: HTML, CSS, and XML. HTML is the language used to create web pages. CSS is the language used to style web pages. XML is the language used to store and transport data. The W3C standards are updated regularly to keep pace with the changing needs of the web. It is important to follow the W3C standards to ensure that your website is compatible with all browsers and devices.

✔ **Charset** Charset is the character set used in the document. It defines the mapping between the bytes in the document and the characters that they represent.

Charset is the character set used in the document. It defines the mapping between the bytes in the document and the characters that they represent. The most common charset is UTF-8. It is important to have the correct charset to ensure that the browser renders the page correctly. If you are using a different charset, you should specify it in the document. For example, if you are using UTF-16, you should use the UTF-16 charset. The UTF-8 charset is the most common and is recommended for all new websites.
