Charset is the character set used in the document. It defines the mapping between the bytes in the document and the characters that they represent. The most common charset is UTF-8. It is important to specify the charset in the document to ensure that the browser can correctly display the text. If you do not specify the charset, the browser will assume a default charset, which may not be the correct one. This can lead to garbled text being displayed. To avoid this, you should always specify the charset in the document. The UTF-8 charset is the most common and is recommended for all new websites.
