✓ **Flash** `<embed src="..." type="application/x-shockwave-flash" data-bbox="0 0 0 0">`

Flash is a software package for multimedia content, including vector graphics, text, and video. It is used to create rich internet applications (RIAs) and interactive content. Flash content is typically embedded in web pages using the `<embed>` or `<object>` tags. Flash content is often used for animations, interactive elements, and video playback. However, Flash content is not supported by all devices and browsers, and it can be slow to load. It is recommended to use HTML5 and CSS3 for modern web development.

✓ **Iframe** `<iframe src="...">`

An iframe is an HTML element that allows you to embed another document inside the current document. It is used to display content from another website or to embed a video player. The `src` attribute of the `<iframe>` tag specifies the URL of the content to be displayed. Iframes are often used for embedding social media widgets, video players, and external content. However, iframes can be used for phishing and other malicious purposes, so it is important to be cautious when using them.

The image shows a mobile-optimized contact form for WinActor. At the top, there is a blue header with the WinActor logo and a cartoon robot character. Below the header, the text "CONTACT US NOW FOR A FREE CONSULATION!" is displayed in blue. The form consists of four input fields: "Name:", "Business Email:", "Country:" (a dropdown menu), and "Company:". A blue "SUBMIT" button is located at the bottom of the form. A close button (X) is visible in the top right corner of the form area.
