✔ **Doctype** Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in.

Doctype is the first line of the HTML document. It tells the browser which version of HTML the document is written in. The most common doctype is HTML5. It is important to have a doctype to ensure that the browser renders the page correctly. Without a doctype, the browser will use a default doctype, which may not be the one you want. The doctype is a declaration of the document type, and it is used to tell the browser which version of HTML to use. The doctype is a declaration of the document type, and it is used to tell the browser which version of HTML to use. The doctype is a declaration of the document type, and it is used to tell the browser which version of HTML to use.

● **W3C Validity** W3C is the World Wide Web Consortium. It is the international community that develops and maintains the standards for the World Wide Web.

W3C is the World Wide Web Consortium. It is the international community that develops and maintains the standards for the World Wide Web. The W3C is a not-for-profit organization that is responsible for the development and maintenance of the World Wide Web standards. The W3C is a not-for-profit organization that is responsible for the development and maintenance of the World Wide Web standards. The W3C is a not-for-profit organization that is responsible for the development and maintenance of the World Wide Web standards. The W3C is a not-for-profit organization that is responsible for the development and maintenance of the World Wide Web standards. The W3C is a not-for-profit organization that is responsible for the development and maintenance of the World Wide Web standards. The W3C is a not-for-profit organization that is responsible for the development and maintenance of the World Wide Web standards.

✔ **Charset** Charset is the character set used in the document. It is a set of characters that are used to represent text in a document. The most common charset is UTF-8.

Charset is the character set used in the document. It is a set of characters that are used to represent text in a document. The most common charset is UTF-8. The charset is a declaration of the character set, and it is used to tell the browser which character set to use. The charset is a declaration of the character set, and it is used to tell the browser which character set to use. The charset is a declaration of the character set, and it is used to tell the browser which character set to use. The charset is a declaration of the character set, and it is used to tell the browser which character set to use. The charset is a declaration of the character set, and it is used to tell the browser which character set to use.
